Summary

Hello, I consider myself a full-stack web developer because I have the knowledge and ability to be able to develop or maintain a web system from front-end, backend, server, and search engine optimization.

I have more than 7 years of experience in developing and deploying projects for the internet with success.

Many hours reading and understanding documentation, refactoring and writing code and very good dealing with issues and bugs.

In some projects, I led and was also part of the programming team for the development of huge websites, gambling and betting systems as well as I have assisted in the maintenance and development of new features to banking accounting systems and report systems.

I have been in charge of campaigns on google for clients such as luxury hotels in Central America and Mexico with a target public in Central America, Europe, and North America.
