About Me

Good person and Web developer with 7 years of coding. With excellent debugging skills. My focus technologies are JavaScript, TypeScript, Angular CLI, PHP, Rest APIs, MySQL, HTML5 and CSS.

Experience with custom developments from scratch and also with PHP or JavaScripts frameworks, for example, Laravel or Angular, very good working front-end and backend even I have dealt with database design and structuring.

Beyond the professional area, I have also gained a lot of experience from my personal projects. I've tried a lot of crazy things.

What I have done

- Massive data management, big reports, real-time statistics and big data with data tables (using eg: ag-grid)
- Creation of customized complex and unique algorithms and formulas to solve unique needs.
- Development of complex systems using routes, MVC architecture and object-oriented programming. (OOP)
- Database design and standardization (MySQL).
- Queries, Stored Procedures and functions in Mysql.
- Implementation of Braintree, Greenpay, PayPal and Stripe APIs (Payment gateways).
- Login with SDK API of Facebook and Google (PHP).
- Consuming and developing PHP API Rest from scratch and SOAP (nusoap PHP Lib).
- Creation of front-end interfaces in Angular 8 with TypeScript.
- Complex management systems with Async PHP and dynamic Data responses using AJAX and JSON for Callbacks.
- Custom PHP Plugins, Widgets and Themes for Wordpress.
- System maintenance and debugging. (PHP, JavaScript, MySQL).
- Dynamic Responsive websites and Web applications, using CSS, jQuery, Angular, Bootstrap and others.
- Websites and Web applications Optimization. (Improving the code, minifying, data compressing, etc).
- Scraping with JavaScript.
- Server management and ability to create a development environment for any lamp project.
- Strong understanding of web master concepts (SSL, IIS, DNS and IP configuration).
