Summary

Full-stack web developer with 7+ years experience participating in the complete product development lifecycle of successfully launched web applications. From backend programming, coding in PHP to frontend programming, coding in JavaScript, Angular CLI, HTML5, and CSS3.

Good understanding of object-oriented programming and MVC pattern design. Excellent debugging skills and good webmaster concepts in terms of development environment setup (lamp, wamp, SSL, DNS, IP configuration, Cloudflare).

Good understanding of web services and SOA related standards like REST / OAuth / JSON.

A day in my life may consist of: prepping a new project in Angular CLI with basic assets, fixing some front-end bugs, adding an API Rest endpoint, MySQL database design, create some WordPress plugin from scratch, configuring a unit or UI test library, setting up a build or deployment plan, provisioning a test tier machine or feature work.

Experience

Web Developer

Jazz Gaming Solutions • San Jose, Costa Rica   01/2018 - 09/2020

I was responsible for developing, implementing and maintaining mostly internal web applications. I collaborated with technical and business staff in the design, development, testing, implementation and production support of enterprise applications in PHP and Angular CLI.

We primarily used MEAN Stack. 40% of my work was doing front end development, 40% back end development and the remaining 20% was dev-ops/sys admin related tasks.

Web Developer

PROFI • San Jose, Costa Rica   04/2014 - 02/2017

At PROFI, I was working on PHP, WordPress, Javascript (Angular CLI and vanilla).

Some of my web apps included: Custom WordPress plugins and widgets, digital menu boards, mobile/desktop business dashboards, online website plugins, and APIs integrations. I was also responsible for managing my team's web infrastructure, SEO, marketing, and website design.

I also developed a hotel reservation system built in PHP and uses MySQL to store data.

The script provides a powerful room booking and reservation management functionality.

Web Developer

CIP Reporting • Virginia, United States   08/2016 - 06/2017

At my current position, I am working on a large reporting system for casinos. Giving them maintenance and programming new reports and new functions. We use technologies such as PHP 5.3v, MySQL databases, jQuery, CSS, and AJAX.

In addition to full-stack development, I also working on a lot of dev-ops tasks. I have

helped set up a lot of our unit, UI, and build/deploy plans.

Email templates design in HTML and CSS. SMTP and mailPHP email templates sending.

Web Developer

Netsoft • San Jose, Costa Rica   03/2013 - 02/2014

When I was 18, my first job was at NETSOFT.

Programming and maintaining ERP systems.

One of them was Dolibarr, a very robust open-source made in PHP and MySQL.

I did some things like, develop new reports, migrate and export data in JSON and XML format, modify MySQL databases, SMTP emails, design templates with HTML and CSS, among some other things.

Technologies

- PHP
- JavaScript
- TypeScript
- JQuery
- Git

- MySQL
- Angular
- CSS
- HTML5

Education

High school

Liceo Ingeniero Manuel Benavides Rodriguez • San Jose, Costa Rica   02/2015

Currently completing courses in computer science, robotics and statistics

Languages

- Spanish

- English
